

**ENERGY MISSISSIPPI, LLC  
STANDARD INTERCONNECTION APPLICATION AND AGREEMENT  
FOR RESIDENTIAL NET METERING FACILITIES (for systems 20 kW or less)**

INSTRUCTIONS: Enter information in the empty fields below and send this form to Entergy Mississippi, LLC (“Entergy” or the “Company”). **This Standard Interconnection Application and Agreement shall be completed, submitted and approved before** the net metering facility is installed and connected to the Company’s Distribution grid. If you have questions related to this form, contact your Entergy representative or if you do not have an assigned representative contact 1-800–Entergy. (Form date 12-1-2018 – MPSC Docket 2018-UA-39.)

*The Customer may want to have the vendor of the equipment help fill out this application.*

**I. STANDARD INFORMATION**

**Section 1. Customer Information**

Name: \_\_\_\_\_

Mailing Address: \_\_\_\_\_

City: \_\_\_\_\_ State: \_\_\_\_\_ Zip Code: \_\_\_\_\_

Facility Location (if different from above): \_\_\_\_\_

Daytime Phone: \_\_\_\_\_ Evening Phone: \_\_\_\_\_

Entergy Account Number (from electric bill): \_\_\_\_\_

Customer Email Address: \_\_\_\_\_

**Note: For new customers, Entergy may require proof of site control evidenced by a property tax bill, deed, lease agreement, other legally binding contract, etc.**

**Are you an individual applying for the Low-Income Benefits Adder?**

**Yes No (circle one)**

**If yes, attach affidavit confirming your eligibility (see Attachment 1).**

**Are you a rental property owner applying for the Low-Income Benefits Adder?**

**Yes No (circle one)**

**If yes, attach Low Income Rental Property Addendum confirming your eligibility (see Attachment 2).**

**Are you a rental property owner not applying for the Low-Income Benefits Adder?**

**Yes No (circle one)**

**If yes, attach Rental Property Addendum confirming your eligibility (see Attachment 3).**

**Section 2. Generator and Facility Information (Circle correct answer when possible)**

**Note: Attach One-line Diagram (electrical drawing of installation) with this agreement with Location of Accessible Disconnect clearly shown.**

**ENTERGY MISSISSIPPI, LLC**  
**STANDARD INTERCONNECTION APPLICATION AND AGREEMENT**  
**FOR RESIDENTIAL NET METERING FACILITIES (for systems 20 kW or less)**

Customer Type: **Residential, Commercial, Other** \_\_\_\_\_ (circle one)

Is there an existing interconnected generator at this facility?  
**Yes description attached No (circle one)**

Number of Entergy meters on this house/building? **2 or less, 3 or more (circle one)**

Is electric service to your location provided from the Entergy's Downtown Jackson network?  
**Yes No (circle one)** (Net metering is prohibited in the Downtown Network)

Do you plan to export power? **Yes No (circle one)**

Do you elect to transfer the rights to any Renewable Energy Credits ("RECs") associated with your proposed Facility to the Company? (By selecting yes, you will be eligible to receive the Non-Quantifiable Expected Benefits Adder as a component of your Total Benefits of Distributed Generation)  
**Yes No (circle one)**

If no, please confirm you understand that retaining the RECs associated with your proposed Facility means you will not be eligible to receive the Non-Quantifiable Expected Benefits Adder as a component of your Total Benefits of Distributed Generation \_\_\_\_\_ **(please initial, if applicable)**

Proposed aggregate generation output rating at this site (Total kW): \_\_\_\_\_

Expected annual energy generation from system (Total kWh/year): \_\_\_\_\_  
 Is the unit able to run when Company electricity is unavailable? **Yes, No (circle one)**

Battery Backup **Yes description attached No (circle one)**

For Solar Installations: Tilt Angle (°): \_\_\_\_\_ Azimuth Angle (°): \_\_\_\_\_

Inverter Size (Total kW) \_\_\_\_\_

Number of phases at interconnection point: **One Phase Three Phase (circle one)**

Voltage at interconnection point: **120/240 120/208 277/480 4 80**  
**other explain** \_\_\_\_\_ (circle one)

Does the unit

- Disconnect intertie within 10 cycles of a service interruption or fault? **Yes No (circle one)**
- Block generator from energizing dead circuits for five minutes after most recent fault? **Yes No (circle one)**

Note:

1. Include manufacturer literature describing the specific system(s).
2. If more units will be used, complete separate attachment with the information above.

**Section 3. Certification**

I hereby certify the following:

1. The system shall be installed in compliance with the Building/Electrical Code of that city/county.
2. This system meets the latest edition of the Entergy Standard: "Connecting Small Electric Generators to the Entergy Distribution System (less than 500kVA)".
3. The interconnection protection system is tested and listed for compliance with the latest published edition of Underwriters Laboratories (UL) 1741 including the anti-islanding test.
4. The system will be installed in compliance with IEEE 1547 as applicable, all manufacturer specifications, the National Electric Code and all local codes. No protection settings affecting anti-islanding have been or will be adjusted or modified.
5. The system shall be installed in accordance with the attached one-line Diagram and the system description provided in this document.
6. I have been given system warranty information, an operation manual, and shall be instructed in the operation of the system.

I hereby certify that all of the information provided herein (including all attachments) is true and correct and the generator will comply with the Interconnection Standard stated above. Customer or installer shall not commence parallel operation of the Facility until the Facility has been inspected and the approval to operate has been issued by the Company.

**II. INTERCONNECTION AGREEMENT TERMS AND CONDITIONS**

This Standard Interconnection Agreement for Net Metering Facilities ("Agreement") is made and entered into this \_\_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_, by and between Entergy Mississippi, LLC ("Entergy" or the "Company") and \_\_\_\_\_ ("Customer"), a \_\_\_\_\_ (specify whether corporation or other), each hereinafter sometimes referred to individually as "Party" or collectively as the "Parties". In consideration of the mutual covenants set forth herein, the Parties agree as follows:

**Section 1. The Net Metering Facility**

The net metering facility (the "Facility") meets the requirements of Mississippi Renewable Energy Net Metering Rule and the Mississippi Distributed Generator Interconnection Rule (the "Rules") as established or amended by the Mississippi Public Service Commission ("PSC").

**Section 2. Governing Provisions**

The parties shall be subject to the provisions of the Rules and PSC Orders, the terms and conditions set forth in this Standard Interconnection Application and Agreement, and the Company's applicable tariff schedules and policies.

**Section 3. Maintenance and Permits**

The Customer shall obtain and maintain any governmental authorizations and permits required for the construction and operation of the Facility and interconnection facilities before the Facility is interconnected. The Customer shall maintain the Facility and interconnection facilities in a safe and reliable manner and in conformance with all applicable laws and regulations.

**Section 4. Interconnection**

Company shall furnish and install a bidirectional 2-channel meter meeting the Company-approved meter standard for the Customer's type of service. Customer shall provide and install a meter socket for the Company's meter and any related interconnection equipment per the Company's technical requirements, including safety and performance standards.

The Customer shall submit an Interconnection Application to the Company at least thirty (30) days prior to the date the Customer intends to interconnect a Facility with the Company's facilities. Such notification shall include a detailed electrical diagram of the Facility for the Company's review. Said diagram shall demonstrate that the proposed Facility is capable of safely and reliably operating in parallel with the Company's facilities.

**ENTERGY MISSISSIPPI, LLC**  
**STANDARD INTERCONNECTION APPLICATION AND AGREEMENT**  
**FOR RESIDENTIAL NET METERING FACILITIES (for systems 20 kW or less)**

Within ten (10) days of receipt of the Interconnection Application, the Company shall inform the Customer in writing or by electronic mail that the Interconnection Application is complete or incomplete and indicate what, if any, materials are missing. If the Interconnection Application is complete, the Company shall assign a Queue Position.

Within fifteen (15) days after notification by the Company that the Customer's Interconnection Application is complete, the Company shall review the plans for the Facility and provide the results of its review to the Customer. The Company shall follow the screening and evaluation criteria of the Interconnection Application in accordance with the Mississippi Distributed Generation Interconnection Rules. Any items that would prevent parallel operation due to violation of applicable safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations. If any such items are identified, the Customer shall provide evidence that all Company-proposed safety related corrections to the Customer's original (same) Facility plans have been satisfactorily remedied and that the Customer has all equipment necessary to complete the interconnection. The interconnection of a Facility is subject to the following conditions: (i) it must be approved by local or municipal electric code officials with jurisdiction over the interconnection; (ii) the Company has received the required information on the Certificate of Completion from the Customer (Completion of local inspections may be designated on inspection forms used by local inspecting authorities); and (iii) the Company has completed its Witness Test in accordance with the Mississippi Distributed Generation Interconnection Rule.

Within ten (10) business days of the estimated commissioning date indicated on the Interconnection Application, the Company shall conduct a Witness Test at the Facility to ensure that all equipment has been properly installed and that all electrical connections have been made in accordance with applicable codes. If a Facility fails the Witness Test, the commissioning date must be extended a minimum of ten (10) days. When a Facility is not approved under a Level 1 review, the Customer may submit a new Interconnection Application for consideration under Level 2 or Level 3 procedures.

The burden to prove the date upon which any required notification or material is mailed to the Company shall be on the Customer. If any required notification or material is delivered by mail, the date of notification or receipt of material shall be deemed to be the third day following the mailing of said notification or material.

To prevent a Customer from back-feeding a de-energized line, the Customer shall install an industry-accepted disconnect switch that is accessible to Company personnel at all hours.<sup>2</sup>

The Customer, at Customer's own expense, shall meet all safety and performance standards established by local and national electrical codes including the National Electrical Code (NEC), the Institute of Electrical and Electronics Engineers (IEEE), the National Electrical Safety Code (NESC), Underwriters Laboratories (UL), and any other relevant standards specified by the PSC. Additionally, the Facility, at the Customer's expense, shall meet all reasonable safety and performance standards that are necessary to assure safe and reliable operation of the Facility when connected to the Company's electrical system and that have been adopted by the Company.

---

<sup>2</sup> See PSC Order dated August 4, 2016, in Docket 2016-UN-32 for waiver of the requirement contained in the provision of the Mississippi Distributed Generator Interconnection Rule, page 19, Chapter 12, paragraph 100, "Level 1 interconnections do not require an external isolation device."

**ENTERGY MISSISSIPPI, LLC**  
**STANDARD INTERCONNECTION APPLICATION AND AGREEMENT**  
**FOR RESIDENTIAL NET METERING FACILITIES (for systems 20 kW or less)**

Customer shall not commence parallel operation of the Facility until the Customer has received approval to operate from the Company. The Company's installation of a net meter at the location is deemed approval to operate the interconnected system. The Facility approval and Standard Interconnection Agreement execution process shall not be unreasonably withheld or delayed. Notwithstanding the foregoing, the Company's approval to operate the Customer's Facility in parallel with the Company's electrical system should not be construed as an endorsement, confirmation, warranty, guarantee, or representation concerning the safety, operating characteristics, durability, or reliability of the Customer's Facility.

Modifications or changes made to a Facility shall be evaluated by the Company prior to being made. The Customer shall provide to the Company in writing detailed information describing the modifications or changes prior to making the modification to the Facility. Any items that would prevent parallel operation due to violation of applicable safety standards and/or power generation limits shall be explained along with a description of the modifications necessary to remedy the violations.

If the Company's existing facilities are not adequate to interconnect with the Facility, any changes will be performed in accordance with the Company's policies and schedules on file with and approved by the PSC.

The Company shall design, procure, construct, install, and own any Distribution System Upgrades. The actual cost of Distribution System Upgrades, including overheads, shall be directly assigned to the Customer.

**Section 5. Interruption or Reduction of Deliveries**

Customer shall deliver the as-available energy to the Company at the Company's meter.

The Company shall not be obligated to accept and may require Customer to interrupt or reduce deliveries when necessary in order to construct, install, repair, replace, remove, investigate, or inspect any of its equipment or part of its system; or if it reasonably determines that curtailment, interruption, or reduction is necessary because of emergencies, forced outages, force majeure, or compliance with prudent electrical practices. Whenever possible, the Company shall give the Customer reasonable notice of the possibility that interruption or reduction of deliveries may be required. Notwithstanding any other provision of this Agreement, if at any time the Company reasonably determines that either the Facility may endanger the Company's personnel or other persons or property, or the continued operation of the Customer's Facility may endanger the integrity or safety of the Company's electric system, or the Customer is not operating the system in compliance with the terms and conditions of this Agreement, the Company shall have the right to disconnect and lock out the Customer's Facility from the Company's electric system. The Customer's Facility shall remain disconnected until such time as the Company is reasonably satisfied that the Facility can operate in a safe and compliant manner.

**Section 6. Access to Premises**

The Company may enter the Customer's premises to inspect the Customer's protective devices and read or test the meter.

**Section 7. Indemnity and Liability**

Each party shall indemnify the other party, its directors, officers, agents, and employees against all loss, damages expense and liability to third persons for injury to or death of persons or injury to property caused by the indemnifying party's engineering design, construction, ownership or operations of, or the making of replacements, additions or betterment to, or by failure of, any of such party's works or facilities

**ENTERGY MISSISSIPPI, LLC**  
**STANDARD INTERCONNECTION APPLICATION AND AGREEMENT**  
**FOR RESIDENTIAL NET METERING FACILITIES (for systems 20 kW or less)**

used in connection with this Agreement by reason of omission or negligence, whether active or passive. The indemnifying party shall, on the other party's request, defend any suit asserting a claim covered by this indemnity. The indemnifying party shall pay all costs that may be incurred by the other party in enforcing this indemnity. It is the intent of the parties hereto that, where negligence is determined to be contributory, principles of comparative negligence will be followed and each party shall bear the proportionate cost of any loss, damage, expense and liability attributable to the party's negligence.

Nothing in this Agreement shall be construed to create any duty to, establish any standard of care with reference to or any liability to any person not a party to this Agreement. Neither the Company nor its officers, agents or employees shall be liable for any claims, demands, costs, losses, causes of action, or any other liability of any nature or kind, arising out of the engineering, design, construction, ownership, maintenance or operation of the Customer's Facilities by the Customer or any other person or entity. Neither shall the Company, its officers, agents or employees have any requirement or responsibility to make replacements, additions or betterment to the Customer's Facility.

**Section 8. Notices**

All written notices shall be directed as follows:

COMPANY

ENTERGY MISSISSIPPI, LLC  
Attention: Manager, Customer Service Support  
P.O. Box 1640  
Jackson, MS 39215

CUSTOMER

Name: \_\_\_\_\_  
Address: \_\_\_\_\_  
City: \_\_\_\_\_

Customer notices to Company shall refer to the Customer's electric service account number set forth in Section 1 of the Standard Information section of this Agreement.

**Section 9. Term of Agreement**

The term of this Agreement shall be the same as the term of the otherwise applicable standard rate schedule. This Agreement shall remain in effect until modified or terminated in accordance with its terms or applicable regulations or laws.

**Section 10. Assignment**

This Agreement and all provisions hereof shall inure to and be binding upon the respective parties hereto, their personal representatives, heirs, successors, and assigns. The Customer shall not assign this Agreement or any part hereof without the prior written consent of the Company, and such unauthorized assignment may result in termination of this Agreement.

**Section 11. Rates and Regulations**

**ENTERGY MISSISSIPPI, LLC  
STANDARD INTERCONNECTION APPLICATION AND AGREEMENT  
FOR RESIDENTIAL NET METERING FACILITIES (for systems 20 kW or less)**

The Customer has read and accepted the jurisdictional rates and regulations.

**Customer will take service pursuant to the Company's Net Energy Metering Rider Schedule and charges associated with net metering service set out in the Company's Net Energy Metering Rider Schedule will be charged to the Customer's account. The Customer, at his/her own expense, shall meet all safety and performance standards necessary to assure safe and reliable operations of the Facility with the Company's distribution system.**

**Section 12. Consent to Release Customer Specific Information**

The Customer consents to permit Entergy to release Customer specific confidential Entergy account information, including this Agreement, to \_\_\_\_\_ solely for the purpose of installing/ or evaluating the feasibility of installing a net metered generator for interconnection with the Entergy system. Entergy shall not disclose such information to any other party or for any other purpose than that described herein.

**Section 13. Renewable Energy Credits ("RECs")**

If the Customer elects on the application form for its Facility to transfer the rights to any Renewable Energy Credits ("RECs") associated with the Customer's Facility to the Company, the Customer will be eligible to receive the Non-Quantifiable Expected Benefits Adder as a component of Total Benefits of Distributed Generation.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representatives.

**Attachment 1  
CERTIFICATION OF ELIGIBILITY FOR LOW-INCOME BENEFITS ADDER**

I, \_\_\_\_\_, living at  
*(First Name) (Middle Initial) (Last Name)*

\_\_\_\_\_  
*(Street Address) (City) (State) (Zip Code)*

in \_\_\_\_\_ County, Mississippi, request the Low-Income Benefits Adder as set forth in Entergy Mississippi's **Net Energy Metering Rider Schedule**. To qualify for the Low-Income Benefits Adder, I state under oath and under penalty of perjury that the following is true and accurate:

- My total annual combined gross household income does not exceed **\$23,760**.<sup>3</sup>
- The electric service account at my primary residence is in **my name**.
- I have not and will not request the Low-Income Benefits Adder for any electric service account other than my primary residence.

I understand that the information provided in this certification is subject to audit and verification as deemed necessary by Entergy Mississippi, and failure to comply with any request for additional information in conjunction with such audit and verification can result in disqualification of eligibility for the Low-Income Benefits Adder.

\_\_\_\_\_  
**Customer Signature Account No. Number Phone**

<sup>3</sup> This income threshold amount will be updated in February of each year to be equal to 200% of the federal poverty level as published annually by U.S. Department of Health & Human Services.
