C. ADJUSTMENTS

First - Plus or minus an amount determined in accordance with Company's effective Energy Cost Recovery Rider on file with the Mississippi Public Service Commission. The kWh used in computing the adjustment will be one twelfth (1/12th) of the energy used annually by the units in service at the end of the month.

Second - Plus or minus a percentage adjustment on the pre-tax billing sufficient to compensate Company for any increase in income taxes above the 1993 level or to reduce Customer's billing to adjust for any decrease in any effective income tax rates.

(Continued on reverse side)

Upon any change in the effective rates of income taxes the Company will file within 30 days the percentage adjustment to be applied for the remainder of the year based on operations for the prior calendar year. Subsequently the percentage adjustment to be applied during a year will be filed with the Commission prior to February 1 of each year and will be based on the prior calendar year's operations. The adjustment will be such percentage as may be necessary to obtain the same after-tax income under the effective tax rates as would have been realized under the income tax rates in effect for the year 1993 without this income tax adjustment.

Third - Plus the applicable proportionate part of any directly allocable tax, impost, or assessment imposed or levied by any governmental authority, which is assessed or levied against the Company or directly affects the Company's cost of operation and which the Company is legally obligated to pay on the basis of meters, customers, or rates of, or revenue from electric power and energy or service sold, or on the volume of the energy generated, transported, purchased for sale, or sold, or on any other basis where direct allocation is possible.

IV. TRAFFIC CONTROL SIGNAL LAMPS AND LAMP REPLACEMENTS

The "average watts per lens" of the traffic control signal lamps hereunder shall be determined by the average of all lenses for each direction of traffic controlled. Lamp wattage shall be the actual watts of power used; when so-called "extended service" or "long-life" lamps are used, it is recognized that the "watts of power used" may be greater than the nominal wattage of such lamps for equivalent lighting output.

When Company agrees to furnish and replace lamps hereunder, it will make such replacements within a reasonable time after notification by Customer but shall not be responsible to Customer for replacement without such notification.

V. CONTRACT PERIOD

Not less than one year.

VI. RESERVATION

Subject to orders of regulatory authorities having jurisdiction and to the provisions of Company's Service Policy currently on file with the Mississippi Public Service Commission.
